QUALIFICATIONS

With over 8 years of experience leading website development projects, I have a deep understanding of the entire development lifecycle. My expertise in gathering user requirements allows me to create websites that meet the needs and expectations of my clients and end-users. My keen eye for detail and ability to produce clean, well-organized code ensures that the websites I develop are both functional and aesthetically pleasing.

One of my strengths is my ability to convert mockups into fully functional websites. This requires me to translate design elements into code while also ensuring that the website is responsive and compatible with a wide range of devices and platforms. My focus on creating clean, robust code also means that the websites I develop are secure and less prone to errors or vulnerabilities.

I am committed to delivering websites that meet and exceed customer demands. This involves not only achieving compatibility targets, but also going above and beyond to ensure that my clients are satisfied with the final product. My excellent communication skills allow me to work closely with clients, stakeholders, and team members to ensure that projects are completed on time and within budget.

Overall, my experience and skills make me a valuable asset to any team or project that involves website development. I am able to take a project from inception to completion with ease, ensuring that the end result is a high-quality website that meets the needs of clients and end-users alike.

TECHNICAL PROFILE

- Creating web and mobile applications using, HTML, CSS (scss, Bootstrap, Tailwind css), Javascript (jQuery, Vanilla JS, React.js, Next.js), Wordpress and Photoshop
- Maintaining, optimizing, troubleshooting, and improving websites
- Implementation of apps and landing pages from concept through deployment

WORK EXPERIENCE

Red rock development

Front End / Wordpress Developer

August 1, 2019 - Present

- Create Wordpress Theme from scratch based on the design (PSD) provided.
- Ensures pixel perfect

- Ensures the website working on all major Web browsers (Desktop /Mobile)
- Coded using HTML, CSS and JavaScript to develop features for both mobile and desktop platforms.
- Develop Javascript to meet client needs
- Use LESS/SASS Gulp/Grunt Git/SVN for better and faster development
- Communicate with the Scrum master daily for reports and impediments
- Collaborated with stakeholders during development processes to confirm creative proposals and design best practices.
- Assembled and addressed technical and design requirements, integrating user-facing and front-end elements to maintain web presence effectiveness.
- Translated UX and business requirements into elegant code solutions.
- Use regulatory and compliance standards for user interface designs.
- Improved tools to boost user interaction and deliver design versatility.
- Assisted back end developers with troubleshooting and problem solving.
- Identified and resolved website performance flags to improve functionality.
- Identified bottlenecks and bugs and devised solutions.
- Followed SDLC best practices within Agile environment to produce rapid iterations for clients.
- Tested web-based product functionality and delivered iterations to customer.
- Administered Wordpress content management systems for content teams.
- Integrated enhancements into web design to improve user stickiness, smooth functionality, and boost load times.
- Delivered responsive web design projects in Agile framework.
- Supported A/B testing concepts and version control.

5asec Dubai

June 1, 2018 - July 30, 2019

Front-End Web Developer

- Converting PSD to Interactive UI/UX
- worked in both agile and waterfall methodologies.
- Tested front-end code in multiple browser's to ensure cross browser's compatibility. Maintained brand standards under company guidelines.
- Consulted and documented UI best practice and code standards.
- Leveraged responsive web frameworks to consistently complete product deliverables ahead of schedule.
- Translated UX and business requirements into elegant code solutions.
- Coded using HTML, CSS and JavaScript to develop features for both mobile and desktop platforms.
- Integrated web applications for mobile platforms into front end environment.
- Integrated enhancements into web design to improve user stickiness, smooth functionality, and boost load times.
- Tested web-based product functionality and delivered iterations to customer.
- Followed SDLC best practices within Agile environment to produce rapid iterations for clients.
- Supported A/B testing concepts and version control.

High Speed Internet Services Technology LLC (Outsourced Quality Assured Services Inc.)

Nov 2 2017 - May 24 2018

Front-End Web Developer

- Converting PSD to Interactive UI/UX
- worked in both agile and waterfall methodologies.
